

Health System Membership

WHAT IS AMIA?

The American Medical Informatics Association (AMIA) is a community committed to the vision of a world where informatics transforms health care. **It's** the professional home for the informaticians of today and the driver for the future of informatics.

AMIA's 5,500+ members are subject matter experts in the science and practice of informatics as it relates to clinical care, research, education, and policy. AMIA supports its members and the field through education, training, accreditation, certification, and advocacy and provides extensive opportunities for networking and collaboration.

Individual members include clinical and health informatics professionals (physicians, nurses, dentists, pharmacists, and other clinicians); translational and clinical informatics scientists, researchers, and educators; biomedical and health science librarians; advanced students pursuing a career in informatics; developers, computer, artificial intelligence, and data scientists; government officials and policymakers; consultants and industry professionals.

AMIA's membership also includes industry partners, academic institutions, and [health systems and hospitals](#).

A UNIQUE NEED

Health systems and hospitals are faced with the challenge of maintaining and improving the knowledge and skills of an engaged healthcare workforce.

Competition for skilled staff makes offering access to high-quality professional development and training even more important. Professional development and training is the one tool employers have that continuously improves the workplace through relevant education and career growth opportunities for individual employees. With so many varied options for employee engagement, upskilling, and professional **development, it's** critical to select educational content from a trusted, credible source.

AN EASY SOLUTION

AMIA is your trusted, credible source for high-quality, educational opportunities.

The Health System Membership is designed to help organizations support the health informatics education and training needs **of staff in health systems and hospital settings**. **AMIA's many** online educational programs — the [10x10 Virtual Courses](#), the [AMIA Health Informatics Certification Review Course \(ARC\)](#), the [Clinical Informatics Board Review Course \(CIBRC\)](#), and the new [Health Informatics Essentials](#) courses — are all available through the Health System Membership.

Through the membership, individual health system and hospital employees are granted credits they can use to take advantage **of AMIA's digital, learning-on-demand** programs. Plus, they receive other value-added benefits to help them engage in the informatics community.

MEMBERSHIP ELIGIBILITY

The Health System Membership is available to organizations that deliver or pay for healthcare or public-health services.

Health systems include integrated delivery networks, hospitals, clinics, provider groups, home health agencies, insurance companies, state/county/city departments of health, government agencies, and healthcare quality-and-safety-promotion organizations. A membership may be held at the corporate, regional, or local level.

MEMBERSHIP BENEFITS

All Health System Members will receive these valuable member benefits.

Educational Credit Allotments
Health System Members receive educational credit allotments, which may be redeemed for **AMIA's** online educational offerings by the members' individual employees, whether they are AMIA members or non-members. The number of included educational credits varies by Health System Membership level.

AMIA Individual Memberships
Health System Members receive AMIA individual memberships to foster engagement in the association. The individual members receive all regular **AMIA membership benefits and AMIA's** communications. The number of included individual memberships varies by Health System Membership level.

AMIA Conference Registrations
Health System Members receive AMIA conference registrations, which may be **redeemed for any of AMIA's in-person** conferences, to encourage further educational training and networking. The number of included conference registrations varies by Health System Membership level.

Health Systems Council
Health System Members are eligible to appoint a representative to serve on the Health Systems Council and participate **in the Health System Council's virtual** monthly meetings and in its two face-to-face business meetings held in conjunction with in-person conferences. Council members network, share ideas, discuss issues that affect health systems and hospitals, and weigh in on public policy topics.

Public Policy Rapid Response Teams
AMIA convenes a response team of policy experts and institutional members who generate comments on regulation and other public policy matters. AMIA codifies the comments in responses. Via the appointed Health Systems Council representative, Health System Members may contribute to the comments. A Health System Member may also coordinate its own responses with those of AMIA, amplifying the comments from both AMIA and the health system.

AMIA Membership Directory
Health System Members gain access to the AMIA membership directory, which provides individual names, titles, institution names, and other useful contact information.

Recognition
Health System Members will be recognized in the informatics community on **AMIA's** website and **at AMIA's in-person** conferences.

MEMBERSHIP LEVELS

AMIA's Health System Membership is available at four different levels, offering a simplified way for health systems to select the benefits that best meet their needs, engage their leadership, and educate their employees.

Health System Membership Levels	Level 1	Level 2	Level 3	Level 4
Membership Fee	\$5,000	\$10,000	\$15,000	\$25,000
Educational Credits	25	50	75	125
AMIA Individual Membership for Informatics Leaders*	1	2	3	4
AMIA Conference Registration for Informatics Leaders*	1	1	2	2
Savings Compared to Regular Price**	Save \$6,350	Save \$11,700	Save \$18,100	Save \$28,400

* Informatics leaders include titles such as CHIO, CNIO, CMIO, CRIO, CDO, CAO, Director of Informatics, etc.

** Regular price assumes à la carte pricing at the non-member rates. Health System Membership offers preferred pricing for all benefits listed. Membership level regular price values: Level 1 – \$11,350 | Level 2 – \$21,700 | Level 3 – \$31,100 | Level 4 – \$53,400

EDUCATION OPPORTUNITIES

Your Health System Membership provides access to **AMIA's online**, on-demand educational opportunities — all at preferred member pricing. Using your educational credit allotment, mix and match the educational offerings to meet your health system or hospital's needs.

Digital Education Options	Education Credit Values
AMIA 10x10 Virtual Courses	One Registration = 10 credits
AHIC Review Course (ARC)	One Registration = 5 credits
CIBRC Online Plus	One Registration = 8 credits
CIBRC Bundle	One Registration = 14 credits
Health Informatics Essentials	One Registration = 1 credit (per course)

10x10 Virtual Courses

AMIA's 10x10 Virtual Course Program utilizes curricular content from certified informatics training programs and other AMIA educational initiatives. Topics range from introductory health informatics courses to more specialized courses focusing on nursing informatics and clinical decision support. These courses are ideal for those looking to advance their health care profession with informatics training.

AMIA Health Informatics Certification Review Course (ARC)

This course helps health informatics professionals prepare to sit for the AMIA Health Informatics Certification (AHIC) exam. The AHIC Review Course (ARC) is a sustained study program with all 40+ hours of AMIA Health Informatics Essentials lectures. Through 119 brief lectures with hundreds of hyperlinked references and resources and several quizzes per unit, ARC will help learners become familiar with the content and types of questions on the AHIC exam. The goal of ARC is to help learners identify gaps in their knowledge that require additional self-study and to think about how they could be tested on the application of knowledge. Through an online forum, ARC will also provide opportunities for learners to interact with each other and the instructors in support of achieving AMIA certification.

Clinical Informatics Board Review Course (CIBRC)

This course provides American Board of Medical Specialties (ABMS) board-certified physicians with resources to assist in becoming certified in the subspecialty of clinical informatics. The course offerings are a resource for all practicing clinical informaticians seeking to strengthen their knowledge of the field. Two options are available:

CIBRC Online Plus

This on-demand, in-depth online course includes 30 hours of online learning content, provided in 23 modules, knowledge check quizzes per module, and 200 exam-style review questions.

CIBRC Bundle

This three-day, intensive course is led by distinguished faculty, who are leaders in Biomedical Informatics and board-certified practicing clinical informaticians combined with CIBRC Online

Health Informatics Essentials

Comprised of five separate courses, AMIA Health Informatics Essentials offers more than 40 hours of on-demand education. Each CME/CNE-certified course offers topical modules with multiple video lectures, ranging in length from 8 to 30 minutes. With a curriculum based on **AMIA's Health Informatics Delineation of Practice** published in JAMIA (Gadd et al, 2020), learners access subject matter that is core to the practice of health informatics. The courses are designed for professionals who are involved in direct or indirect care of patients and who desire to learn more about the practice of health informatics coming from a range of educational and training pathways, including but not limited to nursing, medicine, pharmacy, dentistry, public health, health informatics, and computer science. Valued at just one educational credit each, the five available courses are:

Health Informatics Essentials: Foundational Knowledge

Health Informatics Essentials: Decision-Making

Health Informatics Essentials: Health Information Systems

Health Informatics Essentials: Data Governance, Management, and Analytics

Health Informatics Essentials: Leadership, Professionalism, Strategy, and Transformation

ENHANCE YOUR MEMBERSHIP

Design your Health System Membership to meet your **organization's** needs.

Add additional online educational offerings to make informatics education more accessible to more employees and provide the opportunity to sharpen their skills and knowledge to stay abreast of what is happening in the industry.

Health System Membership Add-On		
Online Educational Offerings	Health System Member Fee	Non-Member Fee
10 x 10 Virtual Course	\$1,999	\$2,395
CIBRC* Online Plus	\$1,650	\$1,960
CIBRC* Bundle	\$2,780	\$3,400
AHIC* Review Course (ARC)	\$999	\$1,499
Health Informatics Essentials Course	\$199	\$399

* CIBRC = Clinical Informatic Board Review Course | AHIC = AMIA Health Informatics Certification

To allow more of your key representatives to engage in AMIA through working groups, scholarly publications, public policy discussions, networking at conferences and more, we encourage the representatives to join AMIA.

SAMPLE MEMBERSHIP

This sample Level 4 Health System Membership demonstrates how the included benefits may be redeemed and how add-on options can further enhance your membership.

Level 4 Membership (125 Educational Credits)	\$25,000
Eight (8) 10 x 10 Virtual Courses	80 credits
Five (5) ARC Courses	25 credits
One (1) CIBRC Bundle	14 credits
Six (6) Health Informatics Essentials Courses	6 credits
Four (4) AMIA Individual Memberships	Included
Two (2) AMIA Conference Registrations (Annual Symposium)	Included
Add-On Options	Fees
One (1) 10 x 10 Virtual Course	\$1,999
Four (4) Health Informatics Essentials Courses	\$796
Total Investment with Add-On Options	\$27,795

Educate your staff. Engage your leadership. Enhance your hospital system.

Join AMIA today.
