AMIA Clinical Informatics Fellowship Match Agreement

By participating in the AMIA Match, programs agree to hire whichever applicants they match, subject to the matched applicant meeting the stated terms and conditions for appointment to the program, as communicated by the program during the recruitment process. A match can only be made if the program verifies their information in the AMIA Match system AND commits their rank list by the scheduled deadline �, including any necessary constraints. If you make a mistake or wish to withdraw from the match you may un-commit your rank list, however this must be done prior to the scheduled deadline �.
